Shape area calculator

```
/**
 *
 * @author RVUW282
 */
abstract class Shape {
}
class Circle extends Shape {
    double radius = 5;

    void calculateArea() {
        double area = 3.14 * radius * radius;
        System.out.println("Circle Area: " + area);
    }
}

class Rectangle extends Shape {
    double length = 4;
    double width = 6;

    void calculateArea() {
        double area = length * width;
        System.out.println("Rectangle Area: " + area);
    }
}

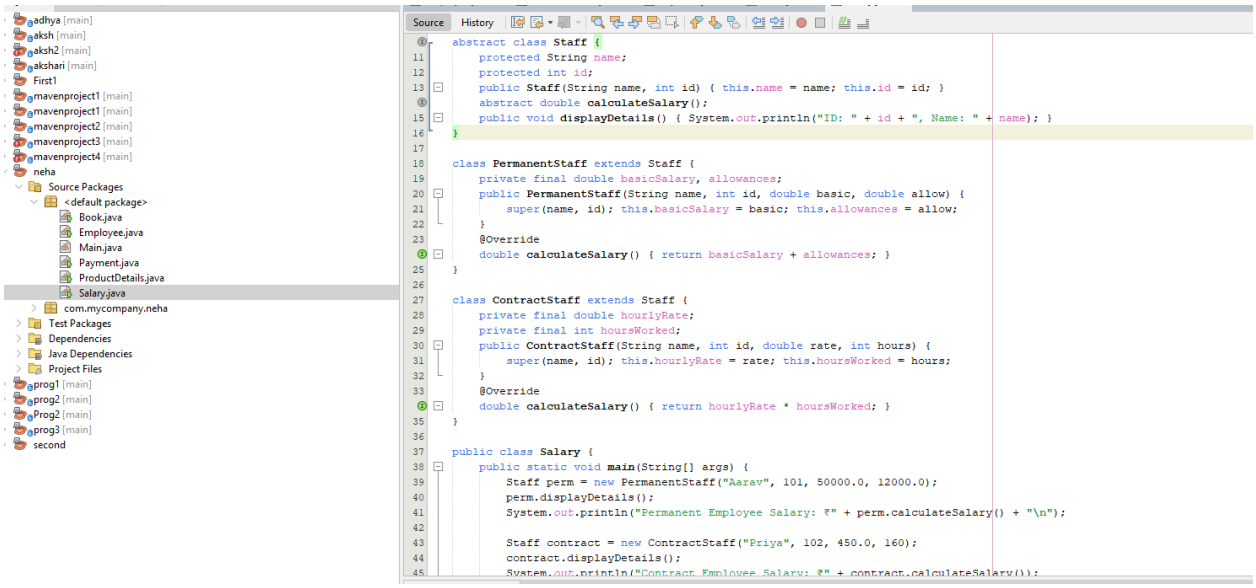

public class Main {
    public static void main(String[] args) {
        Circle c = new Circle();
        c.calculateArea();

        Rectangle r = new Rectangle();
        r.calculateArea();
    }
}
```
